

Marketing Link Analytics Report

Generated Jul 16, 2026, 4:33 PM PDT from live CSA Store data.

This report summarizes live signup/source behavior and explains how marketing links are tracked.

Executive Summary

- Signup totals now come from subscribe form completions, not only the smaller marketing subscriber-event table.
- Clicks and subscribe-page views are combined into Arrival clicks so each tracked session is counted once where possible.
- Paid-source attribution depends on UTMs, click IDs such as fbclid/gclid, tracked redirect slugs, or browser referrer data.

18 internal test submissions were removed from all report totals.

How Links Are Tracked

- Tracked CSA Store links use /api/marketing/go/:slug to record the click, create a session, and forward the visitor to the subscribe page.
- UTM fields identify source, medium, campaign, content, and term. CSA fields such as csa_track and csa_link connect a click/session to a completed signup.
- Direct landing URLs are also tracked now. If there are no UTMs, click IDs, tracked slugs, or referrer, the source remains Direct / Unknown.

Tracked Arrival Clicks

Link / source	Focus	Arrival clicks	Signups	Signup rate
Farm Angle - farm-brand-tests-farm	farm	live split		N/A
CSA Angle - farm-brand-tests-csa	csa	live split		N/A
Food Angle - farm-brand-tests-food	food	live split		N/A
dropsite_host	N/A	14		N/A
Direct / Unknown	direct landing	4	42	N/A
deckfamilyfarm.com	N/A	1		N/A

Arrival clicks combine tracked redirect clicks and subscribe-page loads into one deduped session count where the tracking token/session is available. Farm-brand-test rows split by the tracked farm, CSA, or food message focus. The last confirmed static farm-brand-test total was 271 arrival clicks and 2 signups; the dynamic download fills the individual live counts.

Direct / Unknown arrivals count direct subscribe-page sessions captured by the tracker. Older direct signups may not have an arrival record, so that row may show N/A for signup rate.

Signup Breakdown

Status	Signups
won	25
in_progress	19

Plan	Signups
forager	31
grazer	6
guest	4
